

At Pexus LLC, we believe in creating real value for our clients with our products and services. Whether you are looking to explore and implement innovative IT solutions to take your business to the next level or looking for ways to improve your existing IT infrastructure, operations and application development, you will find us to be your most trusted Information Technology partner

Consulting

Our consultants are experts with number of years of experience in their chosen field. We can work with your company for implementation or maintenance of application environments based on J2EE (Java 2 Enterprise Edition), SOA (Service Oriented Architecture), .NET with diverse application integration middleware technologies including Open Source software solutions.

We also offer Agile SDLC experienced professionals, PMP Certified Project Management professionals and certified Security Consultants.

IT Staff Augmentation

We screen our consultants so that you don't have to. Our founder's strong IT Experience enable us to go the extra step in vetting our consultants technically to ensure it meets or exceeds our client's expectations. We work with our clients on a continual basis to solicit feedback to ensure you are getting the best resources for your projects.

Application Development

Pexus LLC offer application software development, application testing, application management, installation and deployment services in a flexible deliverable based model that can combine onsite, offshore or a combination of onsite and offshore development and project management resources. Our technical leads and solution architects work closely with customers locally and interface with offsite resources to offer the best just in time skill requirement and offering the most cost effective project development.

We use the industry proven software development life cycle methodology including Agile, Waterfall or hybrid with standard software engineering templates to track each phase of design, development, testing, deployment and maintenance.

Your Trusted IT Partner in Value Creation!

Pexus Products

Pexus LLC currently features the following products:

Pexus Perflog: PerfLog is an open source performance and diagnostic logging framework for J2EE applications. Pexus PerfLog logging framework offers deep J2EE application performance insight to application architects, application developers and IT operations team.
